Production Policy Memo 10
Revised June, 1996

Musicians, Arrangers, Composers, Choreographers & Fight Directors

The basic music support for productions does not include live music, the services of a composer or an arranger, or the services of live musicians to make special recordings, choreographer or fight director.

Directors wishing to have such music support for their productions must secure the approval of the Production Manager before making any commitments or budget support assumptions.

Each request will be considered on the basis of artistic objectives and the budget in relation to the total production program requirements.
